11 Causes of Hair Loss in Women | SELF
The most common cause of hair loss is a hereditary condition that happens with aging. This condition is called androgenic alopecia, male-pattern baldness and female-pattern baldness. It usually occurs gradually and in predictable patterns — a receding hairline and bald spots in men and thinning hair along the crown of the scalp in women.

Urinating Too Often? 12 Causes of Frequent Urination in Women
In pregnant women, temporary changes in the physiology and anatomy of the urinary tract make expectant mothers prime candidates for cystitis and pyelonephritis. Kidney and bladder infections can pose a serious risk to pregnant women and their unborn children, because they increase the risk of premature contractions or delivery and sometimes death of the fetus or newborn infant.

Hair loss - Symptoms and causes - Mayo Clinic
Uterine sarcoma starts in the muscle and fibrous tissue that form the uterine wall. This cancer is rare. While its cause is unknown, uterine sarcoma occurs most often in middle-aged and elderly women. African American women and women who have had pelvic radiation to treat other cancers may be more likely to develop this cancer. Doctors aren't ...

Causes of depression in women. Women report experiencing depression at much higher rates than men. This gender disparity may be explained by a number of social, biological, and hormonal factors that are specific to women. Premenstrual problems.

A guid cause ... The women's suffrage movement in Scotland ...
Women who have given birth vaginally in the past are at a greater risk of frequent urination. Giving birth in this way is known to make the pelvic floor weaker, and the pelvic floor is the body part that holds the bladder up and in place. This affects some women with children more than others. 7. Anterior Prolapse

Urinary Tract Infection in Women Guide: Causes, Symptoms ...
Vaginal discharge often changes colors, depending on the time of the menstrual cycle. Some colors indicate that the area is healthy, while others can signal an infection or a hormonal imbalance.

HelpGuide.org
Kegel exercises are less helpful for women who have severe urine leakage when they sneeze, cough or laugh. Also, Kegel exercises aren't helpful for women who unexpectedly leak small amounts of urine due to a full bladder (overflow incontinence).
